National Asian & Pacific Islander HIV/AIDS Awareness Day

- If you are HIV-negative, PrEP is a once-a-day pill that prevents you from getting HIV.
- Frequent testing, about every 3 months is recommended if you are sexually active to know your status.
- If you have HIV, being on treatment can keep your virus levels undetectable and decrease your chances of passing HIV to partners.

BanyanTreeProject.org
The Banyan Tree Project is a national social marketing campaign to end HIV/AIDS in API communities.
